The Center has presented three researches conducted with financial support of Sida. The condition of mental health, the state of job opportunities for graduates with disabilities and the status of teachers and educational leaders who train computer and sign language skills,”

Ms. Mastewal Moges, from Sida Coordination office of AAU, mentioned the financial support of Sida has been helping many graduate level (MA and PhD) students to achieve their academic career. The office also gives support to carryout workshops and other similar activities.
